This memo is to inform you that the compounds listed below were not able to be validated by USDA's Pesticide Data Program (PDP) and were not analyzed in canned pineapple during the timeframe of January 2017 through December 2017. These compounds have established U.S. tolerances for pineapple but did not recover through the QuEChERS Multiresidue Method (MRM) employed by the Michigan Department of Agriculture laboratory, which was one of two PDP laboratories assigned to test canned pineapple for PDP during this time period.

Alpha-naphthalene acetic acid	Hydramethylnon
Avermectin B1	Inorganic bromide
Cryolite and synthetic cryolite	Magnesium phosphide
Cyromazine	O-phenylphenol
Endothall	Paraquat
Ethephon	Phosphine
Fluorine compounds	Prochloraz
Fosetyl aluminum	Quizalofop ethyl
Glyphosate	Sulfuryl fluoride

Data for the other laboratory assigned to test canned pineapple, the Florida Department of Agriculture and Consumer Services, will be communicated in a separate memo. Please contact the Monitoring Programs Division at (202) 572-8167 with any questions or comments.
